

Immunizations

Kidslink Preschool is licensed by the state of Kansas. Therefore, we are required to only admit children that are currently up to date on their immunizations

KDHE REQUIREMENTS

Immunization	Total Required
Diphtheria, Tetanus, Pertussis (DTaP/DT/Td/Tdap)	4
Polio (IPV) (OPV)	3
Measles, Mumps, Rubella (MMR)	1
Hepatitis B (HBV)	3
Varicella (Chicken Pox)	1
Haemophilus influenzae type b (Hib)	3-4 (ask doctor)
Pneumococcal (PCV7) (PCV13)	4
Hepatitis A	2

Check your immunization records to see if your child needs to receive additional immunizations. Some immunizations are a series and must have an interval between shots. For example: HEP A (2 doses total) must have at least a 6 month interval between series 1 and series 2. Please get started as soon as possible with the first dose of Hep A, so we can document that your child is "in process" of complying with the new regulations. Have the doctor or the nurse administering the immunization, document when the next immunization will be scheduled. Please bring that documentation for your child's file.
